

DRAW YOUR OWN **SPACE DOG**

...to the snout and collar-bit.

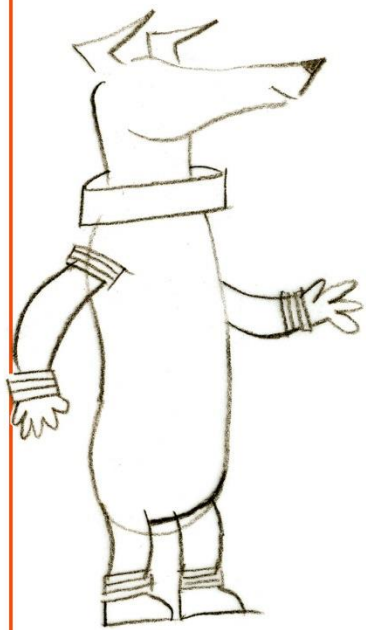

Then, a peanut shaped body,

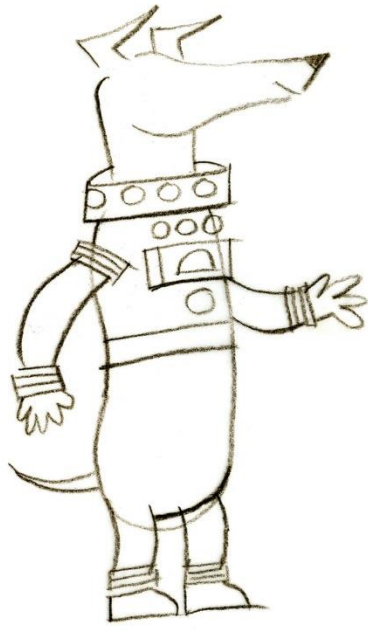

and some arm and leg shapes.

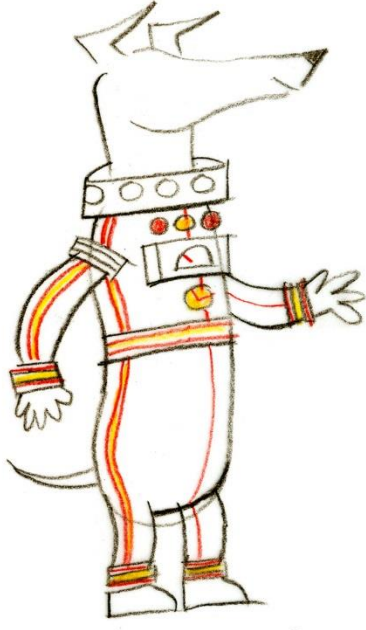

I usually start with the **EARS** and then work downwards...

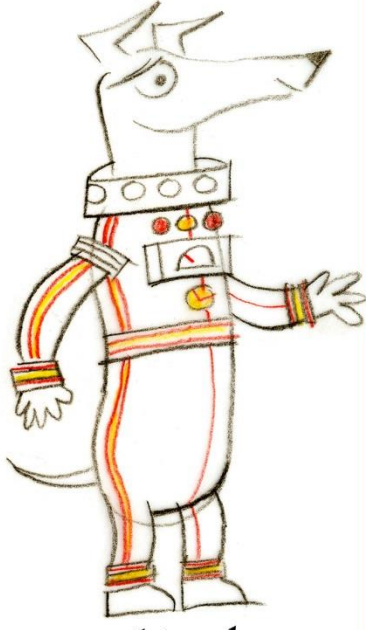

Now the paws and feet

and a few space suit details. (And a tail.)

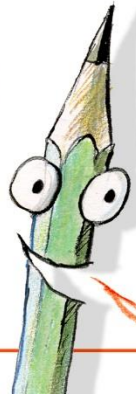

Add a bit of **COLOUR**

And lastly the **EYE**. That brings you to life, Space Dog.

Thanks!

OK - over to you now for **SOME DRAWING.**
