

# MAKE YOUR OWN FLYING BIRD

*Fiddliness level: Not too bad*

First, print this on A4 paper or even better, card - or copy this shape to make your own template.

Then flip over and put some colour on the back of your bird.

FOLD

FOLD

Flip back this way to colour your front with anything you have - or collage it with bits of paper.

Let it dry, then fold along the dotted line in the middle. Now cut out your bird. Fold your wings down a bit. Cut your hole for hanging up. Tie some string or ribbon through the hole. Fiddle with the wings to make your bird balance. Hey presto - your bird is ready to fly!
